

CHANGES / REQUIREMENTS

Does OSHA require everyone to be trained in first aid?

OSHA **recommends**, but **does not require**, that every workplace include one or more employees who are trained and certified in first aid, including CPR. The other option for employers is to rely upon the reasonable proximity of an infirmary, clinic or hospital.

Is CPR training required by OSHA?

OSHA Compliance for **CPR** and First Aid Training
Employers are **required** by **OSHA** standard 29 CFR 1910.151 to have a person or persons adequately trained to render first aid for worksites that are not in near proximity to an infirmary, clinic, or hospital.

Is AED training required by OSHA?

OSHA does not have any legally-binding statutes governing the use or presence of defibrillators in the workplace, though it does require that workplaces employ people trained in first-aid care and in CPR if the workplace is not in close proximity to a hospital or other health care facility. While OSHA recommends that workplaces consider purchasing a defibrillator as part of their first-aid kit and training employees in their use, there is no requirement to do so.

How often is training good for?

CPR certificates expire after two years. The American Safety & Health Institute (ASHI) recognize all CPR certificates as valid for up to two years from the course completion date and two years for first aid training. The expiration date is listed on the certificate and on an individual's CPR card.

Our Guarantee

We at Facility Results offer practical target course on First Aid, Emergency Response, Resuscitation, CRP & AED that capitalize on every minute spent in the classroom. Satisfaction Guaranteed.

Please provide full names of attendees so that completion badgers can be ordered & presented upon completion of training.

First Aid, Emergency Response, Resuscitation CPR/AED Training

ASHI Certification

FIRST AID, EMERGENCY RESPONSE, RESUSCITATION & CPR/AED TRAINING

ASHI Certification

DISCRIPTION

While you can't predict when an emergency will occur, you can be prepared. In less time than you think, First Aid, Emergency Response, Resuscitation training from Facility Results can give you the vital knowledge and skills you'll need to respond to a life-threatening situation, perhaps one that requires First aid/CPR/AED knowledge, with confidence. Upon completion of training, each attendee will receive an ASHI certificate valid for 2 years.

DURATION

2 - 4 Hours, during the days & hours that follow:
Monday – Friday, 8am – 5pm.
A review with Management will take place following the training where we will review the feedback that was noted during the class, speaker evaluation and cover critical areas of concern.

FORMAT

PowerPoint Presentation, Instructor Demonstrations, Video, Open Discussion, One or Two Seasoned Trainers.

FORMAT

Supervisors, Engineers, Managers & any other personnel and First Responders. Safety personnel should also attend to evaluate their facility safety programs and identify the needs of their employees.
